

MEDIUM X2

THE ALLROUNDER

ADVANTAGES

Larger hopper volume

The right body for all applications

Hydraulic concept designed for energy efficiency and modular control system, already future-orientated for alternative drives

Variable body concept in length, width & height

ABOUT THE MEDIUM X2

The all-rounder with optimised body volume and large hopper offers a usable volume of 21 to 24 m³ as standard, up to 30m³ for special applications – and in the MEDIUM X2H version with a 200 millimetre higher body and the same vehicle length, even a volume

of up to 31 m³. This is perfect for collection in areas with wide access roads and a high proportion of 4-wheel containers. The refuse fraction can be set on the control terminal: Recyclables, residual waste, biowaste and paper are compacted at the optimum pressure – glass is

also available on customer request. Also ideal for the collection of recyclables in bags.

SERIES OPTIONS

BASIC CONSTRUCTION:

- X2H: Body raised by 200 mm
- X2L: Body reduced by 200 mm
- Closed or open tailgate
- Clean Option

USE IN COMBINATION WITH:

- High-level lifter, low-level lifter and commercial lifter

AREAS OF APPLICATION

**FOR OPEN
LOADING**

**RESIDUAL
WASTE**

**PAPER,
PAPERBOARD,
CARTON**

**INDUSTRIAL &
COMMERCIAL
WASTE**
