

MICRO XL

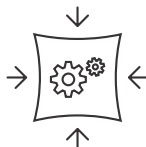

THE AMBITIOUS ONE

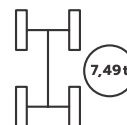

ADVANTAGES

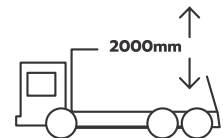

Small turning circle /
great manoeuvrability

Maximum functionality
and robustness in
a compact design

Particularly suitable for
two-axle chassis with
a gross vehicle weight
of 7.49 tonnes

2000 mm
body width

ABOUT THE MICRO XL

A small refuse collection vehicle designed for chassis of up to 8.55 tonnes (7.49 tonnes when unloaded) with a single body that is in no way inferior to the larger vehicles: The body with a volume of 7 or 8 m³ measures just 2 m in width – making it slightly wider than the

other vehicles in the MICRO series, but still very narrow overall. From 2 to 4-wheel bins, it can accommodate all containers for household waste disposal – but its size makes it perfect for selective collection in areas with reversing restrictions.

SERIES OPTIONS

BASIC CONSTRUCTION:

- Prepared for e-chassis

USE IN COMBINATION WITH:

- Low Level Lifter
Omega 359

AREAS OF APPLICATION

**INNER-CITY
BOTTLENECK
DISPOSAL**

**CONTAINER
EMPTYING**

**MANUAL
LOADING**
